PROFILE

I build native iOS apps in Swift and SwiftUI and have product experience from Axis Communications' Mobile Apps team in Lund, where I shipped features in an established codebase. I worked with live video, async/await under strict Swift Concurrency requirements, and observability with Datadog/OpenTelemetry. Since Axis, I have continued building independent iOS projects from architecture and implementation through testing and CI. I value product teams where code quality and knowledge sharing shape the daily work.

TECHNICAL SKILLS

iOS: Swift, SwiftUI, UIKit, Swift Concurrency, async/await, Combine, SwiftData, AVFoundation, Metal/MetalKit, ARKit, MVVM, Swift Package Manager (SPM), accessibility

Quality & delivery: Xcode, XCTest, XCUITest, unit and UI testing, Git, GitHub, GitHub Actions, continuous integration (CI), pull requests, code review, debugging, QA, Jira, Datadog, OpenTelemetry

Mobile & backend: Kotlin, Jetpack Compose, Java, Spring Boot, REST APIs, SQL, JPA, GraphQL

WORK EXPERIENCE

iOS Developer Intern (LIA) - Mobile Apps | Axis Communications

Lund, Sweden | January 2026 - May 2026

- Shipped Swift and SwiftUI features and bug fixes in an established iOS product, including live-video controls for microphone, speaker and PTZ, plus an interactive SwiftUI Canvas interface.
- Migrated selected asynchronous flows to async/await under strict Swift Concurrency requirements and instrumented a multi-step workflow with Datadog/OpenTelemetry to improve failure traceability.
- Took work from investigation and implementation through pull request, code review, testing and QA alongside iOS and Android developers.

Android Developer Intern | Weavy

Malmö, Sweden | April 2023 - November 2023

- Built an Android chat app in Kotlin and Jetpack Compose with authentication, API integrations and responsive UI.

PROJECTS

Independent iOS development | 2026 - present

DeviceMonitor | SwiftUI, SwiftData, Swift Concurrency, MVVM, XCTest/XCUITest, GitHub Actions. App for device status and history with local persistence, search/filtering, separated layers, and automated tests in CI.

MetalVisualKit | Swift Package Manager, Metal, ARKit, SwiftUI. MIT-licensed package for GPU rendering: a compute simulation of about 1,400 particles and LiDAR point clouds of about 49,000 points per frame, with an example app, tests, CI and DocC.

Subtl | Swift 6, SpeechAnalyzer, AVFoundation. App in development for on-device video transcription with an actor-based transcription engine plus preview and export through AVFoundation.

EDUCATION

Java Developer - Backend & Web Development | Grit Academy | Aug 2024 - May 2026

Higher Vocational Education (YH): Java, Spring Boot, JPA, SQL, REST APIs and web development.

iPhone & Android Application Development | Malmö Yrkehögskola | Sep 2022 - Dec 2023

Swift/iOS, Kotlin/Android, mobile development and UX. Additional coursework in on-device ML, Python for AI, testing and digital accessibility.

LANGUAGES & RECOMMENDATION

Swedish: native | English: professional working proficiency | Written recommendation from an Engineering Manager at Axis available on request; recommendations from my manager and mentor are on LinkedIn.
