PROFILE

iOS developer building native apps in Swift 6 and SwiftUI. Five months on the Mobile Apps team at Axis Communications in Lund, shipping live-video controls and async/await migrations into an established production codebase with code review, QA and Datadog/OpenTelemetry instrumentation. Since then I have built my own iOS projects end to end: an open-source Metal and SwiftUI package with 71 tests, DocC and CI, a SwiftData app under strict concurrency, and an on-device captioning app built on SpeechAnalyzer and AVFoundation.

KEY FACTS Axis Communications, 5 months · MetalVisualKit, 71 tests, CI · 49 000 points/frame

EXPERIENCE

JUN 2026 – PRESENT — *Independent iOS development* — Own products and open source · Malmö

- Native iOS apps in Swift 6 and SwiftUI: architecture, implementation, testing, instrumentation and release preparation.
- On-device speech and video pipelines with AVFoundation; GPU work with Metal and ARKit. MetalVisualKit maintained with 71 tests, an example app and CI.

JAN – MAY 2026 — *iOS Developer Intern (LIA), Mobile Apps* — Axis Communications · Lund

- Shipped Swift and SwiftUI features and fixes in an established production iOS app: live-video controls for microphone, speaker and PTZ, and an interactive SwiftUI Canvas interface.
- Migrated selected async flows to async/await under strict Swift Concurrency; instrumented a multi-step workflow with Datadog and OpenTelemetry so failures could be traced.
- Took work from investigation through pull request, code review, testing and QA alongside iOS and Android developers, using Jira.

APR – NOV 2023 — *Android Developer Intern* — Weavy · Malmö

- Built an Android chat app in Kotlin and Jetpack Compose with authentication, REST API integration and a responsive UI, from product specifications with code review and regular releases.

PROJECTS

OPEN SOURCE — *MetalVisualKit* — Swift 6 · Metal · SwiftUI · ARKit · SPM · DocC · GitHub Actions

MIT-licensed Swift package of GPU-backed SwiftUI views: a compute-shader particle loader (about 1 400 particles) and an ARKit LiDAR point-cloud renderer (about 49 000 points per frame) that samples camera colour per point. Swift 6, iOS 17+, 71 tests, example app, DocC and CI on every push.

PUBLIC REPO — *DeviceMonitor* — Swift 6 · SwiftUI · SwiftData · XCTest · XCUITest · GitHub Actions

Degree project: a network-device dashboard with status history, filtering and search. Service, storage and view-model layers behind protocols, actor-safe SwiftData persistence under Swift 6 strict concurrency, 6 unit tests in GitHub Actions and 2 UI tests. iOS 26.2+.

IN DEVELOPMENT — *Subtl* — Swift 6 · SpeechAnalyzer · AVFoundation · Core Animation · StoreKit 2

Captioning for short-form video with transcription on the device, so nothing leaves the phone. One caption-style model drives both the live preview and the AVFoundation export, so the exported file matches what was edited. Actor-isolated transcription engine; in development, with the support site and privacy policy published.

EDUCATION

AUG 2024 – MAY 2026 — *Java Developer – Backend & Web Development, YH* — Grit Academy · Malmö

Java, Spring Boot, JPA, SQL, REST APIs and web development. Final internship (LIA) at Axis Communications.

SEP 2022 – DEC 2023 — *iPhone & Android Application Development, YH* — Malmö Yrkeshögskola · Malmö

Swift/iOS, Kotlin/Android, mobile development and UX, with coursework in on-device ML, Python for AI, testing and digital accessibility.

SKILLS

iOS	Swift 6, SwiftUI, UIKit, Swift Concurrency (async/await, actors), Combine, SwiftData, AVFoundation, Metal/MetalKit, ARKit, RealityKit, Core ML, StoreKit 2, MVVM, Swift Package Manager, accessibility
Quality & delivery	Xcode, XCTest, XCUITest, unit and UI testing, Instruments, Git, GitHub Actions, CI, pull requests, code review, debugging, QA, Jira, TestFlight, Datadog, OpenTelemetry
Beyond iOS	Kotlin, Jetpack Compose, Java, Spring Boot, REST APIs, GraphQL, SQL, JPA

LANGUAGES & REFERENCES

Languages	Swedish (native) · English (professional working proficiency)
References	Written recommendation from an Engineering Manager at Axis available on request; recommendations from my manager and mentor are on LinkedIn.
