PROFILE

iOS developer with experience from the Mobile Apps team at Axis Communications, where I delivered Swift and SwiftUI features in an established iOS codebase. My work included live-video controls, async/await migrations under strict Swift Concurrency requirements, and instrumentation with Datadog and OpenTelemetry. I now build my own iOS projects with SwiftUI, SwiftData, AVFoundation, and Metal, focusing on clear architecture, testing, accessibility, and predictable product behavior.

TECHNICAL SKILLS

iOS: Swift, SwiftUI, UIKit, Swift Concurrency, async/await, actors, Combine, SwiftData, AVFoundation, Metal/MetalKit, ARKit, MVVM, accessibility

Quality and delivery: Xcode, unit and UI testing, continuous integration (CI), GitHub, GitHub Actions, Git, pull requests, code review, debugging, QA, Jira, observability, Datadog, OpenTelemetry

Mobile and backend: Kotlin, Jetpack Compose, Java, Spring Boot, REST APIs, SQL, JPA, GraphQL

WORK EXPERIENCE

iOS Developer Intern (LIA), Mobile Apps | [Axis Communications](#)

Lund, Sweden | January 2026 - May 2026

- Delivered Swift and SwiftUI features and bug fixes in an established iOS codebase, including live-video controls for microphone, speaker, and PTZ, plus an interactive SwiftUI Canvas interface with pan, zoom, and object selection.
- Migrated selected asynchronous flows to async/await under strict Swift Concurrency requirements and instrumented a multi-step workflow with Datadog and OpenTelemetry to improve failure traceability.
- Worked from investigation and implementation through pull requests, code review, testing, and QA in an agile mobile team alongside iOS and Android developers.

Android App Developer | [Weavy](#)

Malmö, Sweden | April 2023 - November 2023

- Built an Android chat app in Kotlin and Jetpack Compose with responsive UI, authentication, and API integrations.

SELECTED PROJECTS

[DeviceMonitor](#) | **SwiftUI, SwiftData, Swift 6, strict concurrency, MVVM, GitHub Actions.** iOS prototype for device status and status history with local persistence, search, and filtering. Built with separated service, storage, and view-model layers, plus unit and UI tests in CI.

[MetalVisualKit](#) | **Swift Package Manager, Metal, ARKit, SwiftUI.** MIT-licensed Swift package for GPU-accelerated rendering with a compute-driven simulation of approximately 1,400 particles and LiDAR point-cloud rendering of approximately 49,000 points per frame, plus an example app, tests, CI, and DocC.

[Subtl](#) | **Swift 6, SpeechAnalyzer, AVFoundation.** iOS app in development for on-device video transcription, built around an actor-based transcription engine and an AVFoundation pipeline for preview and export.

EDUCATION

Java Developer - Backend and Web Development | [Grit Academy](#) | August 2024 - May 2026

Higher Vocational Education (YH) programme: Java, Spring Boot, JPA, SQL, REST APIs, and web development.

iPhone and Android Application Development | [Malmö Yrkeshögskola](#) | September 2022 - December 2023

Swift/iOS, Kotlin/Android, mobile application development, and UX.

Additional coursework: on-device machine learning for Apple and Android, Python programming for AI development, software testing, UX, and digital accessibility.

LANGUAGES

Swedish: native | English: professional working proficiency. Written recommendation from an Engineering Manager at Axis Communications available on request.
