Summary

I am an iOS developer with a focus on UI/UX, something my mentor at Axis Communications singled out. For nearly five months in the iOS team there, I built live video controls and fixed bugs in a production app. I am now finishing my own app, Subtl, for the App Store. It creates captions with AI that runs right on the phone, and I am the only developer.

Experience

iOS Developer Intern (LIA placement) · Axis Communications · Lund, Sweden · Jan 2026 – May 2026

- Built live video controls for microphone, speaker and PTZ (pan-tilt-zoom) in an iOS app that connects to cloud services and IoT devices, so users can listen, talk and control the camera from their phone.
- Migrated selected asynchronous flows to async/await with strict concurrency checking, and created an interactive interface with SwiftUI Canvas.
- Added Datadog and OpenTelemetry tracing to a multi-step flow, so the team can see where errors occur.
- Delivered bug fixes, new components and Datadog analytics through pull requests that were reviewed and merged, in an agile team of iOS and Android developers.

  Tech: Swift, SwiftUI, UIKit, async/await, Datadog, OpenTelemetry, Git, Jira

  My manager at Axis wrote in his letter: “We give him our best recommendation.” More recommendations on LinkedIn.

Android Developer Intern (LIA placement) · Weavy · Malmö, Sweden · Apr 2023 – Nov 2023

- Built an Android chat app in Kotlin and Jetpack Compose on top of Weavy’s REST API, with MVVM (ViewModel and StateFlow), Hilt, Retrofit and token-based authentication with the token in DataStore.

  Tech: Kotlin, Jetpack Compose, Coroutines, Hilt, Retrofit, DataStore, Git

Projects

Subtl · Independent app, preparing for App Store release · Jul 2026 – Present

- The app creates captions with AI speech recognition in English and Swedish and translates them locally, with no account, no uploads and no data collection.
- Transcription runs in an actor under Swift 6, export burns captions into the video or writes SRT and WebVTT, and the five caption styles look the same in preview and export.
- Built Ask Subtl on Apple’s Foundation Models. The assistant searches clips and transcripts through tool calling and proposes changes that the user must confirm.
- Connected the app to Siri, Shortcuts and Spotlight via App Intents, added a Live Activity for background exports and built layouts for the foldable iPhone Duo. The app is in English and Swedish.
- Wrote automated unit and UI tests for the flow from import to export, including dark mode and large text, and set up CI in GitHub Actions with static analysis and a release build.

  Tech: Swift 6, SwiftUI, SpeechAnalyzer, Foundation Models, App Intents · antonsmedberg.github.io/subtl

DeviceMonitor · Grit Academy final project (Distinction), developed into my own app · May 2026 – Present

- A network monitor for iPhone and iPad that finds the devices on the local Wi-Fi network with TCP, ICMP and UDP probes and Bonjour, and charts latency, jitter and outages over time.
- The monitoring engine runs in an actor and writes to SwiftData every 500 ms, with a versioned schema migration. Views only read immutable snapshots, never the database.
- Apple Intelligence (Foundation Models) explains each device on the network without sending data to the cloud. Names and services from the network go in as fenced data to guard against prompt injection.

  Tech: SwiftUI, SwiftData, Foundation Models, Swift Charts, Metal · github.com/antonsmedberg/DeviceMonitor

MetalVisualKit · Open source, MIT licence · Aug 2026

- Swift package that unprojects LiDAR depth data into about 49,000 3D points on the GPU and animates 1,400 particles in a compute shader. It has unit tests in XCTest, a demo app, CI and DocC.
  Tech: Metal, ARKit, Swift Package Manager, XCTest, DocC · github.com/antonsmedberg/MetalVisualKit

Education

Java Developer · Grit Academy · Malmö · Aug 2024 – May 2026
YH diploma, 400 YH credits. Distinction in 15 of 16 courses, including Test-Driven Development in Java and IT Security for Java Developers. Both of the programme's LIA periods were at Axis.

iPhone and Android Programmer · Malmö Yrkeshögskola · Malmö · Sep 2022 – Nov 2023
YH diploma, 280 YH credits. Swift and Kotlin for iOS and Android, Distinction for the LIA and final project.

Courses (Higher Vocational Education)

UX, Digital Accessibility & AI · Malmö Yrkeshögskola · 80 YH credits, Distinction · Sep 2024 – Jan 2025
Modules in UX and digital accessibility, SEO for digital accessibility and UX, and AI in practical work.

Python Programming for AI Development · IT-Högskolan · 30 YH credits, Distinction · Sep 2024 – Jan 2025

Software Testing · Medieinstitutet · 30 YH credits, Distinction · Apr 2024 – Jun 2024

On-Device Machine Learning for Apple & Android · Malmö Yrkeshögskola · 70 YH credits · Sep 2023 – Jan 2024

Skills

iOS: Swift 6, SwiftUI, UIKit, Swift Concurrency, SwiftData, Core Data, AVFoundation, Combine and App Intents (from my internship and own apps). Basic Objective-C.

Testing: automated tests with Swift Testing, XCTest and XCUITest, GitHub Actions and TestFlight

Architecture: MVVM, dependency injection, Swift packages (including a design system), REST APIs

Performance & debugging: Instruments, signposts, Thread Sanitizer, os.Logger, Datadog and OpenTelemetry

Graphics & AI: Metal, ARKit, Core ML, SpeechAnalyzer and Foundation Models

Accessibility: VoiceOver, Dynamic Type, WCAG and UX design

Tools: Xcode, App Store Connect, Git, GitHub, Jira and Figma

Android: Kotlin, Coroutines, Flow, Jetpack Compose and Hilt (from my internship and studies)

Backend: Java, Spring Boot, JPA and SQL (from my YH programme)

AI tools: Claude Code, GitHub Copilot and OpenAI Codex. In Subtl I give Claude Code my own rules and review every change before I commit it.

Languages: Swedish (native) and English (professional)

Other experience

Online Shop Owner · Self-employed · Mar 2020 – Sep 2021

Recruitment Researcher · RC Professional Search AB · Malmö · Jan 2018 – Aug 2019

Other achievements

Judo at elite level
Competed in the Swedish Championships and internationally when I was younger.
